

## **PREFOG Sub-Committee's Mission, Vision & Values**

### **Mission**

The mission of the Pre-FOG Sub-Committee is to develop a regional approach for the reduction, elimination and prevention of Fats, Oils and Grease in our wastewater stream.

### **Vision**

The vision of the Pre-Fog Sub-Committee is to become the regional leader in developing partnerships with vendors, other regional organizations, and the regulated community. These partnerships will contribute to the reduction and elimination of FOG related conveyance system disruptions and to the development of alternative uses for FOG related waste streams.

### **Values**

#### **COMMITMENT TO CITIZENS –**

We believe that our citizens expect and deserve the best possible public services. We strive to meet those expectations with fairness, effectiveness, efficiency, equity and pride.

#### **COMMITMENT TO EXCELLENCE -**

We strive for excellent in the delivery of public services. We believe that progressiveness, competency and a determination to, “do the job right,” are key ingredients in achieving excellence.

#### RESPONSIBILITY AS LEADERS -

We are committed to exercising responsible leadership to attain and express the goals and values of our agencies. Such leadership requires the ability to set well-defined goals and to communicate the methods by which those goals are achieved. The exercise of leadership also means responding to the needs and ideas of the regulated community as those goals are formulated.

#### EFFECTIVE COMMUNICATION –

We are committed to maintaining candid, open communication among group members, partners, elected officials and the general public. Such an on-going process is vital to a healthy, progressive and trusting attitude within our organization and the regulated community.

#### PROFESSIONAL ETHICS –

We affirm that personal integrity characterized by honesty, compassion, fairness and confidentiality is the basis for our day-to-day conduct. We require the highest ethical standards not only of ourselves but of our partners and colleagues.
